Introduction

Sirius reports are quite simply the most powerful reports on the market today, giving teachers and administrators unprecedented insight into course and standards usage and performance data to answer these fundamental questions:

- How much time are my students spending on instruction, practice, and assessment focused on each standard?
- Against which standards and content do I need to provide intervention?
- How much contact will this program provide my students for each standard?
- If my students took the STAAR test today, how would they do?

Sirius reports include two families of data: Course and Standards.

Course reports provide data about student performance on and usage of the interactive lessons and assessments in each Sirius course of materials.

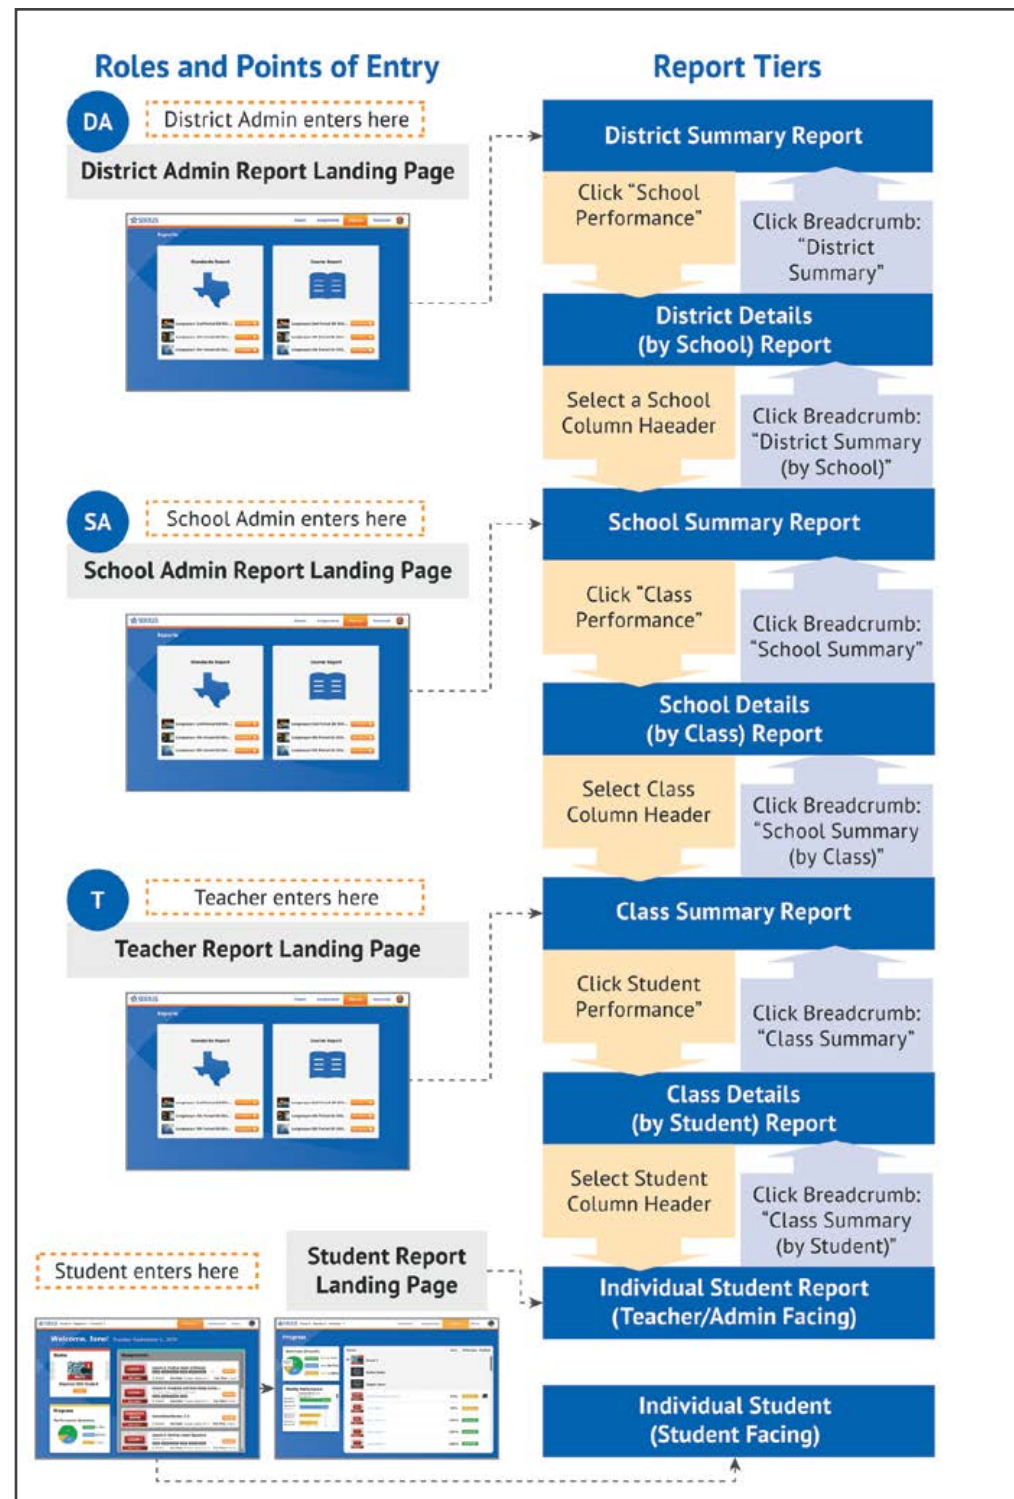

Standards reports provide data about student performance on and usage of those same lessons and assessments against the TEKS.

Vertical Integration

Sirius reports are vertically integrated from District to School to Class to Individual Student. These reports are designed to aggregate student data up to provide insights about an individual student, class of students, school of classes, and district of schools.

This vertical integration allows administrators to gain valuable insights about standards and course performance and usage trends across the district and within each school, class, and student. Administrators can drill down from the district to school to class and student level in a matter of seconds. Zooming in and out helps build a coherent and comprehensive picture of district and school needs.

- All reports are exportable for import to other systems or for further data analysis and include both usage and performance information.
- All reports utilize color coding to aid in data comprehension.
- All reports use filters to tailor the data to specific insights.

Course Reports: Performance

Course Report

Select the Reports tab to enter all Reports.

The screenshot displays the SIRIUS web interface. At the top, there is a navigation bar with the SIRIUS logo on the left and four tabs: 'Classes', 'Assignments', 'Reports', and 'Resources'. The 'Reports' tab is highlighted with an orange background and is enclosed in a yellow box. A callout box with an arrow points to this tab, containing the text 'Select the Reports tab to enter all Reports.' Below the navigation bar, the main content area is titled 'Reports' and is divided into two columns. The left column is titled 'Course Report' and features a blue icon of an open book. Below this icon, there are three entries, each with a small globe icon, the text 'Salazar 3rd Period Math 8', 'Salazar 4th Period Math 8', and 'Salazar 5th Period Math 8' respectively, and an orange 'View Report' button with a refresh icon. The right column is titled 'Standards Report' and features a blue silhouette of the state of Texas. Below this icon, there are three entries, each with a small globe icon, the text 'Salazar 3rd Period Math 8', 'Salazar 4th Period Math 8', and 'Salazar 5th Period Math 8' respectively, and a grey 'View Report' button with a refresh icon.

Course reports provide data about student performance on and usage of the interactive lessons and assessments in each Sirius course of materials.

Course Report: Performance - District Summary

District Administrators can monitor student performance on any course used across the entire district, course by course. The District Summary view provides an overview of student performance across the district based on the distribution of students across schools by each lesson and assessment within each course.

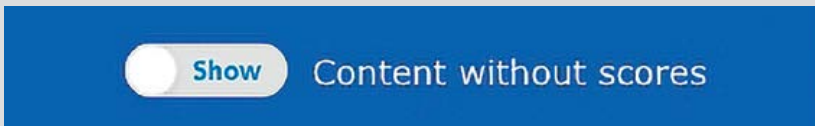

Sirius Course Reports

Sirius Course Reports include a number of features to help educators efficiently gain maximum insight to student performance and usage concept by concept and assignment by assignment. These features are available at every level of the Course report suite and include:

- Performance-based cut scores at the assignment, average, and summary cells to label and color code the report for ease in differentiating skill-based performance

- Report Export at each level of the Details report from District to School to Class to meet any data analysis or manipulation needs. Individual student reports print in a PDF-friendly format.
- Report filter to exclude any course content that does not currently present with scores for a cleaner reporting experience

Key details about this report:

- 1 **Filters** - Select a different course to gain insights of district performance across participating schools.

Course: Grade 8 Mathematics ▼

- 2 Toggle on/off the full course view or show only the parts of the course with score data.

- 3 **Key** - Performance against every lesson and assessment of a course and course summary scores are color coded by STAAR performance level for easier interpretation.

- 4 **District Average** - Summary and average scores by course element are recorded across the entire district.

- 5 **Performance Distribution** - Distribution of performance scores by lesson and assessment in every course across all applicable schools. Clicking any color bar segment reveals how many schools are averaging the corresponding level of performance for that course element or score summary.

- 6 **Details Link** - Click the Details link to go one level deeper in the report for further insights in the District Details report.

- 7 **Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

- Report filter to exclude any course content that does not currently present with scores for a cleaner reporting experience

Key details about this report:

- 1 **Filters** - All courses in use by a class are included in the report.

Course: Grade 8 Mathematics ▼

- 2 Toggle on/off the full course view or show only the parts of the course with score data.

- 3 **Key** - Performance against every lesson and assessment of a course and course summary scores are color coded by STAAR performance level for easier interpretation.

- 4 **Class Average** - Summary and average scores by course element are recorded across the entire class.

- 5 **Performance Distribution** - Distribution of performance scores by lesson and assessment in every course across all students in the class. Clicking any color bar segment reveals how many students are averaging the corresponding performance level for that course element or score summary.

- 6 **Details Link** - Click the Details link to go one level deeper in the report for further insights in the Class Details report.

- 7 **Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

Course Report: Performance - Class Details

Dig into the details of class performance with student-by-student insights against every lesson and assessment in the course.

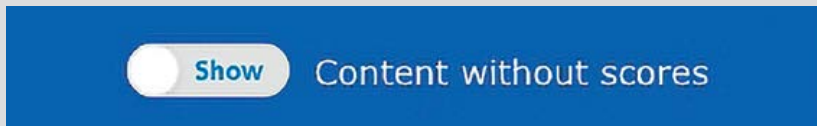

Sirius Course Reports

Sirius Course Reports include a number of features to help educators efficiently gain maximum insight to student performance and usage concept by concept and assignment by assignment. These features are available at every level of the Course report suite and include:

- Performance-based cut scores at the assignment, average, and summary cells to label and color code the report for ease in differentiating skill-based performance

- Report Export at each level of the Details report from District to School to Class to meet any data analysis or manipulation needs. Individual student reports print in a PDF-friendly format.
- Report filter to exclude any course content that does not currently present with scores for a cleaner reporting experience

Key details about this report:

- 1 **Report Buttons** - Switch between Course Performance and Usage information with the click of a button (see Usage reports).

- 2 **Filter** - All courses in use by a class are included in the report.

- 3 Toggle on/off the full course view or show only the parts of the course with score data.

- 4 **Key** - Performance against every lesson and assessment of a course and course summary scores are color coded by performance level for easier interpretation.

- 5 **Rollover Labels** - Roll over column headers to show the name of every student. Click a student to dive deeper into a specific class's performance story.

- 6 Click the View link under details next to each course element to see the corresponding assignment details and gradebook information for every student.

- 7 **Report Data** - Scores for every course element completed by the student are recorded and class average scores are provided for reference.

- 8 **Export Button** - Export data from this report view.

Standards Reports: Performance

Standards Report

Select the Reports tab to enter all Reports.

The screenshot displays the SIRIUS web interface. At the top, there is a navigation bar with the SIRIUS logo on the left and four tabs: 'Classes', 'Assignments', 'Reports', and 'Resources'. The 'Reports' tab is highlighted with an orange background and a white border, and a callout box points to it with the text 'Select the Reports tab to enter all Reports.' Below the navigation bar, the main content area is titled 'Reports' and is divided into two columns. The left column is titled 'Course Report' and features a blue icon of an open book. Below this icon are three entries, each with a small globe icon, the text 'Salazar 5th Period Math 8', and a 'View Report' button. The right column is titled 'Standards Report' and features a blue outline map of Texas. Below the map are three entries, each with a small globe icon, the text 'Salazar 5th Period Math 8', and a 'View Report' button.

Standards Reports provide data about student performance on and usage of those same lessons and assessments against the TEKS.

Standards Report: Performance - District Summary

District Administrators can monitor student performance by TEKS across the entire district, by STAAR-tested course. The District Summary view provides an overview of student performance across the district based on distribution of students across schools by STAAR-aligned cut score.

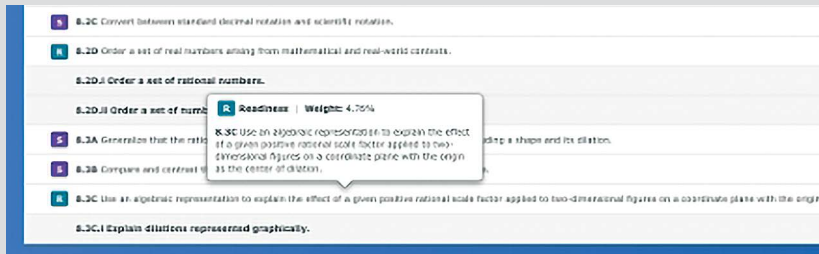

Sirius Standards Reports

Sirius Standards Reports include a number of helpful features related to preparation for the STAAR assessments:

- Data filters to reorganize standards by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting TEKS

- Iconography on the report to indicate which standards are Readiness vs. Supporting Standards
- Weights to indicate a standard's specific impact on the summary score mirroring its frequency on actual STAAR tests

- Performance and Usage metrics down to the item level to precisely measure student exposure and competence with materials addressing a standard

Standards	Details	Single Attempt	Class Average
Summary Score		81%	81%
Math Grade 8 TEKS			
8.1A Explain positive knowledge of sets and subsets and a visual representation to describe relationships between sets of real numbers.	View	72%	70%
8.1B Represent the value of an rational number, as being 7 and square roots of numbers less than 225, and locate that rational number approximation on a number line.	View	76%	80%
8.1C Convert between standard decimal notation and scientific notation.	View	—	79%
8.1D Order sets of real numbers using their mathematical and real-world contexts.	View	84%	81%
8.2J Order a set of rational numbers.	View	81%	81%

Key details about this report:

- 1 **Standards Filter** - Select a grade and subject of TEKS to gain insights of district performance.

- 2 **Filter** - Reorganize and filter the data by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting Standards

Note: Each discipline may have differing filter options.

- 3 **Key** - Performance against the assessed content TEKS is color coded using the STAAR performance levels based on TEA's course-specific STAAR cut scores.

- 4 Monitor performance across all TEKS and breakouts.

- 5 Summary scores at the District level.

- 6 **Performance Distribution** - Distribution of performance scores by TEKS for each course across all applicable schools. Clicking any color bar segment reveals how many schools are averaging the corresponding performance level for that TEKS.

- 7 **Details Link** - Click the Details link to go one level deeper in the report for further insights in the District Details report.

- 8 **Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

Standards Report: Performance - School Details

Dig into the details of school performance with class-by-class insights against every TEKS for every STAAR-tested course.

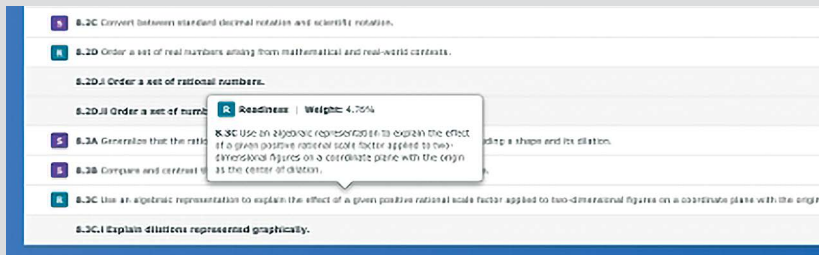

Sirius Standards Reports

Sirius Standards Reports include a number of helpful features related to preparation for the STAAR assessments:

- Data filters to reorganize standards by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting TEKS

- Iconography on the report to indicate which standards are Readiness vs. Supporting Standards
- Weights to indicate a standard's specific impact on the summary score mirroring its frequency on actual STAAR tests

- Performance and Usage metrics down to the item level to precisely measure student exposure and competence with materials addressing a standard

Standards	Details	Single Student	Class Average
Summary Score		81%	81%
Math Grade 8 TEKS			
8.1A Explain inverse operations of multiplication and division using the relationship between multiplication and division.	False	72%	70%
8.1B Represent the value of an rational number, including 0 and square roots of numbers less than 225, and locate that rational number on a number line.	False	76%	80%
8.1C Convert between standard decimal notation and scientific notation.	False	—	79%
8.1D Order a set of real numbers using their mathematical and real-world contexts.	False	84%	84%
8.2A Order a set of rational numbers.	False	81%	81%

Key details about this report:

- 1 Report Buttons** - Switch between Standards Performance and Usage information with the click of a button (see Usage reports).
- 2 Standards Filter** - Select a different set of TEKS to gain insights into school performance.
- 3 Filter** - Reorganize and filter the data by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting Standards
 Note: Each discipline may have differing filter options.
- 4 Key** - Performance against each TEKS is color coded using the STAAR performance levels.

- 5** Monitor performance across TEKS and breakouts class by class across the school.
- 6 Rollover Labels** - Roll over column headers to show the name of every class. Click a class to dive deeper into a specific class's performance story.
- 7 Export Button** - Export data from this report view.
- 8 Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

Key details about this report:

- Standards Filter** - Select a different set of TEKS to gain insights into class performance.
- Filter** - Reorganize and filter the data by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting Standards
 Note: Each discipline may have differing filter options.
- Key** - Performance for each TEKS is color coded using the STAAR performance levels.

- Monitor distribution of performance scores by TEKS for all students in the class. Clicking any color bar segment reveals how many students in the class are averaging the corresponding performance level for that TEKS.
- Click the Details link to go one level deeper in the report for further insights in the Class Details report.
- Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

Course Reports: Usage

Course Report

Select the Reports tab to enter all Reports.

The screenshot displays the SIRIUS web interface. At the top, there is a navigation bar with the SIRIUS logo on the left and four tabs: 'Classes', 'Assignments', 'Reports', and 'Resources'. The 'Reports' tab is highlighted with an orange background and a white border, and a callout box points to it with the text 'Select the Reports tab to enter all Reports.' Below the navigation bar, the main content area is titled 'Reports' and is divided into two columns. The left column is titled 'Course Report' and features a blue icon of an open book. Below this title, there are three entries for 'Salazar' classes: 'Salazar 3rd Period Math 8', 'Salazar 4th Period Math 8', and 'Salazar 5th Period Math 8'. Each entry includes a small globe icon and a 'View Report' button. The right column is titled 'Standards Report' and features a blue silhouette of the state of Texas. Below this title, there are three entries for 'Salazar' classes: 'Salazar 3rd Period Math 8', 'Salazar 4th Period Math 8', and 'Salazar 5th Period Math 8'. Each entry includes a small globe icon and a 'View Report' button.

Course Reports provide data about student performance on and usage of the interactive lessons and assessments in each Sirius course of materials.

Course Report: Usage - District Details

Dig into the details of district usage with school-by-school usage tracking against every lesson and assessment for every course.

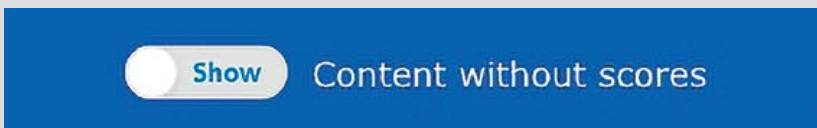

Sirius Course Reports

Sirius Course Reports include a number of features to help educators efficiently gain maximum insight to student performance and usage concept by concept and assignment by assignment. These features are available at every level of the Course report suite and include:

- Performance-based cut scores at the assignment, average, and summary cells to label and color code the report for ease in differentiating skill-based performance

- Report Export at each level of the Details report from District to School to Class to meet any data analysis or manipulation needs. Individual student reports print in a PDF-friendly format.
- Report filter to exclude any course content that does not currently present with scores for a cleaner reporting experience

Key details about this report:

- 1 Report Buttons** - Switch between Course Performance and Usage information with the click of a button (see Performance reports).
Two buttons are shown: 'Performance' in an orange box and 'Usage (minutes)' in a grey box.
- 2 Filter** - Select a different course to gain insights of district usage across participating schools.
- 3** Toggle on/off the full course view or show only the parts of the course with usage data.
- 4 Key** - Performance for each TEKS is color coded using the STAAR performance levels.
- 5** Usage Minutes and Colors can be turned off/on to provide greater clarity.
- 6** Monitor usage across all lessons and assessments school by school across the District.
- 7 Rollover Labels** - Roll over column headers to show the name of every school. Click a school to dive deeper into a specific school's course usage story.
- 8 Export Button** - Export data from this report view.
- 9 Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

Standards Reports: Usage

Standards Report

Select the Reports tab to enter all Reports.

The screenshot shows the SIRIUS web interface. At the top left is the SIRIUS logo. The navigation bar includes 'Classes', 'Assignments', 'Reports', and 'Resources'. The 'Reports' tab is highlighted with an orange box and a callout bubble that says 'Select the Reports tab to enter all Reports.' Below the navigation bar, the 'Reports' section is divided into two main panels. The left panel is titled 'Course Report' and features an icon of an open book. It contains three entries, each with a globe icon, the text 'Salazar 5th Period Math 8', and a 'View Report' button. The right panel is titled 'Standards Report' and features a blue silhouette of the state of Texas. It also contains three entries, each with a globe icon, the text 'Salazar 5th Period Math 8', and a 'View Report' button.

Standards Reports provide data about student performance on and usage of those same lessons and assessments against the TEKS.

Math Grade 8 TEKS			
8.1A Explain process knowledge of two numbers using a visual representation to describe relationships between sets of real numbers.	False	72%	70%
8.1B Represent the value of an rational number, including 7 and square roots of numbers less than 225, and locate that rational number approximation on a number line.	False	76%	80%
8.1C Convert between standard decimal notation and scientific notation.	False	—	79%
8.1D Order sets of real numbers using their mathematical and real-world contexts.	False	84%	81%
8.2J Order a set of rational numbers.	False	81%	81%

Key details about this report:

- 1 Report Buttons** - Switch between Standards Performance and Usage information with the click of a button.
- 2 Standards Filter** - Select a different set of TEKS to gain insights of class usage if and when classes use more than one STAAR-tested course.
- 3 Filter** - Reorganize and filter the data by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting Standards
 Note: Each discipline may have differing filter options.
- 4 Key** - Performance for each TEKS is color coded using the STAAR performance levels.
- 5** Usage Minutes and Colors can be turned off/on to provide greater clarity.
- 6** Monitor usage for TEKS and breakouts student by student across the class.
- 7 Rollover Labels** - Roll over column headers to show the name of every student in the class. Click a student to see that specific student's standards usage story.
- 8 Export Button** - Export data from this report view.
- 9 Breadcrumbs** - Breadcrumbs and Title show your position in Reports.

Standards Report: Usage - Individual Student

Dig into the details of student usage against every TEKS for every STAAR-tested course.

Sirius Standards Reports

Sirius Standards Reports include a number of helpful features related to preparation for the STAAR assessments:

- Data filters to reorganize standards by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting TEKS

- Iconography on the report to indicate which standards are Readiness vs. Supporting Standards
- Weights to indicate a standard's specific impact on the summary score mirroring its frequency on actual STAAR tests

- Performance and Usage metrics down to the item level to precisely measure student exposure and competence with materials addressing a standard

Standards	Details	Single Student	Class Average
Summary Score		81%	81%
Math Grade 8 TEKS			
8.1A Extend previous knowledge of sets and subsets and a visual representation to describe relationships between sets of real numbers.	False	72%	70%
8.1B Represent the value of an rational number, including 7 and square roots of numbers less than 225, and locate that rational number approximation on a number line.	False	76%	80%
8.1C Convert between standard decimal notation and scientific notation.	False	—	79%
8.1D Order sets of real numbers using their mathematical and real-world contexts.	False	84%	84%
8.2A Order a set of rational numbers.	False	81%	81%

Key details about this report:

- 1 Report Buttons** - Switch between Standards Performance and Usage information with the click of a button.
- 2 Standards Filter** - Select a different set of TEKS to gain insights of student usage if and when the student may use more than one grade and subject of standards.
- 3 Filter** - Reorganize and filter the data by:
 - Reporting Categories
 - Clusters and Subclusters
 - Readiness and Supporting Standards
 Note: Each discipline may have differing filter options.
- 4 Key** - Performance for each TEKS is color coded using the STAAR performance levels.
- 5 Usage Minutes and Colors** can be turned off/on to provide greater clarity.
- 6 Monitor usage for TEKS and breakouts** for individual students and comparisons with the class.
- 7 Breadcrumbs** - Breadcrumbs and Title show your position in Reports.
